Objective

I'm a principal-level web engineer with experience in every step of bringing ideas to the web. I can do all of the work myself, work as part of a distributed team, or lead a team to victory.

I'm interested in roles that will allow me to leverage my full skillset. I take a consultative approach to project fulfillment, whether I'm in a formal leadership role or not.

Skills

Experience

Unplay

Sr. Frontend Web Developer

June 2022 - present

My primary role is end-to-end production of websites that work with in-house data and convey the brand according to internal guides.

- Work with designers to produce pixel-perfect websites as designed
- Assess needs for each project to establish architecture and tools
- Manage deployment of sites
- Test and remediate all security and accessibility issues

AskVet

Director of User Experience

November 2020 - June 2022

I worked with the executive team to align products with the company vision.

- Lead the app design team
- Design & wireframe features
- Work with the development team and other departments on timelines

First American Title

Web Development
Manager

February 2014 - November
2020

I was responsible for the creation and maintenance of websites for multiple divisions. I managed a team of developers responsible for:

- Writing and maintaining the HTML, CSS and Javascript files for 10,000+ web pages across roughly 2 dozen sites
- Configuring and maintaining multiple redundant server arrays
- Keeping all servers and web code abreast of modern security standards
- Implementing and running an accessibility and privacy program
- Consulting with internal stakeholders on solutions to business needs

Independent

Web Consultant

January 2013 - February 2014

I engaged directly with a number of different clients to design, produce, launch, and update websites to meet their individual needs. I personally managed client sourcing, rate negotiations, billing, hosting, and fulfillment.
